

Lien Solutions | UCC Filing Interface

## Mitigate Risk and Increase Operational Efficiency

Every day you prepare and file UCCs. Why spend time re-keying data that has already been entered into your loan system? Whether it's a wordy, painful collateral description or a debtor name that, if keyed incorrectly, could jeopardize your perfection, you shouldn't have to deal with redundancy.

### UCC Filing Interface

It is an easy-to-use interface linking your loan system and other lease, loan and financial accounting software to our UCC filing platform, iLien. The result? Increased efficiency, time savings, and greater accuracy to protect you from risk.

### Benefits of Integration

Whether you're a large or small lending institution, if you have a centralized loan management system, UCC Filing Interface is designed for you.

### Why you need UCC Filing Interface:

**Less means more! Less data entry, more accuracy** – The data entered and used for loan documentation and credit application is the same information used for the UCC filing.

A single entry means reduced risk of errors leading to rejected or unperfected filings.

### *Get time back in your day to focus on what's important*

– Our technology saves you time and increases your efficiency. Don't waste time on data entry when you could be focusing on quality control, pursuing new business opportunities – or just going home early! (We won't tell).

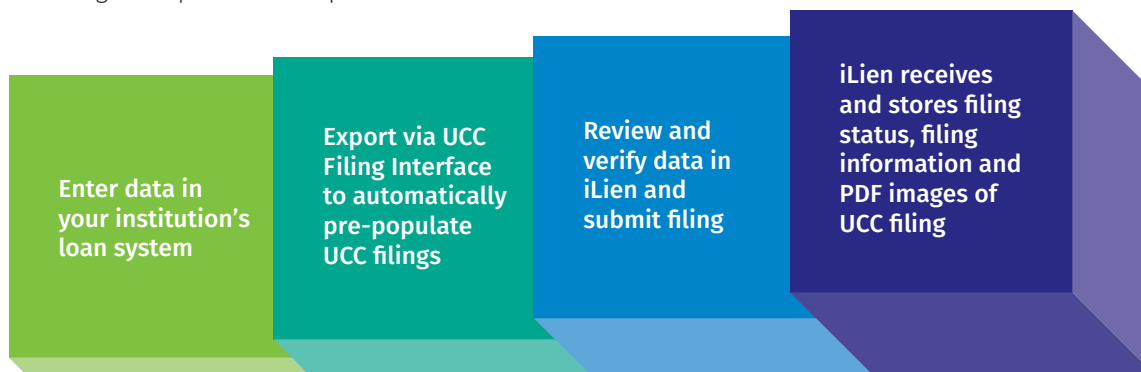

**Consistency counts** – UCC Filing Interface lets you transfer preset preferences from your loan document system to iLien. For consistency and accuracy in fields like the Secured Party name, you can be confident that no matter who enters the information, your data remains consistent.

**Smart technology** – Filing through iLien affords you the benefit of our built-in auditors that check your filings for accuracy of debtor name, missing information and other items that can jeopardize perfection or cause delays through rejection.

**Experience you can trust** – No other service company performs more UCC filings than Lien Solutions. Our experts and smart technology provide the most trusted filing services in the industry so you can have confidence in your lending transactions.

## Simple Process

The integration process is simple.

For even greater accuracy, flexibility and efficiency, ask your Customer Representative about our corresponding back-end interface, which takes the above process full-circle – allowing you to push data and acknowledgement images from iLien back to your loan or lease document systems. This option is perfect for those who want a way to free themselves from the hassle of paper filing systems, scanning, etc. – for the optimal organization.

## Proven Integration with Well Known Systems

Many industry-leading lease, loan and financial accounting software companies have partnered with Lien Solutions to incorporate UCC Filing Interface into their technology.

## Unbeatable Value

Our Professional Services Interfaces team of subject matter experts will work with you to fully integrate the system so that you can achieve lien perfection.

- Consulting services
- Connection set-up
- Interface test environment
- Data migration
